

Efficient. Effective. Essential.

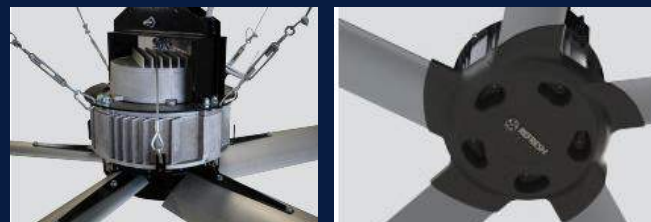

MOST REFRESHING HVLS FANS IN THE WORLD

Our mission is simple. Manufacture fans that circulate large volumes of air, offering excellent energy and cost savings, coupled with extraordinary performance.

This ideology makes our Fans the most refreshing, you can bet on that!

Direct Drive Motor. Green Technology Energizes the Earth and your Business.

FEATURES AND BENEFITS

- ❑ Silent operation with gearless motor and custom airfoil design
- ❑ IP 65 rating for easy cleaning with water jets
- ❑ Ideal to integrate with HVAC systems, for energy savings and CO2 emission reduction
- ❑ Maintenance free motor & Robust steel structure for long life
- ❑ Key safety features (main security wire, stabilizing cables, hub safety ring)
- ❑ Blades terminals designed to optimize performance and acoustic comfort
- ❑ Simple electrical connections
- ❑ Integrated EMC filters to prevent electromagnetic interference from other devices
- ❑ Fans are suitable for operating temperatures up to +50°C / 120°F

ACCESSORIES

- ★ Smart Touch Controller
- ★ Standard Controller
- ★ Custom Length Galvanized Steel Downrod
- ★ Standard & Aesthetic Hub Cover
- ★ I-beam Bracket Kit
- ★ Glulam Beam Bracket Kit
- ★ Z Purlin Bracket Kit

EQ SERIES - 10 TO 24 FT

Powered by the sophistication of Italian design and engineering, Refresh Fans have been created specifically for North American climates and applications.

BIG ON REFRESHMENT. BETTER FOR YOUR FACILITIES.

Through a simple spin, Refresh Fans make a big difference to your facilities. In winter, our fans help bring warm air to the lower levels, preventing heat from escaping. In summer, our fans create a breeze that reduces perceived temperatures significantly. By controlling the perceived temperature of a space, our fans create an optimum environment for occupants and energy savings.

REDUCE HEATING & COOLING COSTS UP TO 30%

Every degree of increase in temperature over 90 degrees Fahrenheit causes a comparable drop in employee productivity. When it comes to domesticated animals or harvested products, the effect is even more drastic. How can you maximize output and craft the best environment for your most valuable resources? Reach out to us and find out how we have helped companies save energy and money with a simple initiative, at a minimal cost.

WE BUILD HVLS FANS FOR:

Industrial
